

the WauK™ board

Bandel Innovations, LLC

Manufactured and Distributed by
Granger Plastics
1600 M.A.D.E. Industrial Dr
Middletown, OH 45044

Two 3" diameter wheels at the foot end that provide smooth rollability.

A rugged built-in footrest that is perpendicular to the board when opened and flush with the board when folded shut.

Made in
America

Standard Functionality

With footrest in closed position the WauK™ board serves as a standard backboard.

Special Functionality

Our one-of-a-kind, patent pending design adds the functionality of a dolly to a conventional backboard.

This unique dolly feature of the WauK™ board allows first responders to:

- roll a patient, rather than carry a patient
- remove patients from the most constricted locations
- prevent career limiting back injuries
- prevent movement of the patient during transport

In a mass casualty event the unique dolly feature of the WauK™ board allows one first responder to transfer patients when manpower is limited.

Attributes

- X-ray translucent
- Lightweight
- Rigid
- Floatable
- impervious to body fluids
- Easily decontaminated

Construction

- Foam filled for rigidity
- Rotationally molded (seamless)

Dimensions

- Overall length — 78"
- Length from top of footrest to head of board — 73"
- Width — 18"
- Thickness — 2"
- Thickness at wheels — 3 1/2"
